SCHOOL OF MINES.

Citizen Man Visits the Institution of Learning.

A special correspondent recently wrote the Albuquerque Citizen as follows:

Your correspondent visited the New Mexico School of Mines this morning. A wind storm made the day disagreeable, but the attendance at the school was excellent. The first hour was spent in Prof. E. A. Drake's room. He is now comfortably quartered in the new brick building, which will some time in the near future be the south wing of the machinery and assay department of the institution. His class in English is now reading Sir Walter Scott's most popular work, "Ivanhoe." Prof. Drake is an excellent English scholar and his classes show excellent training.

I was then escorted to the main building and introduced to Prof. F. A. Jones, principal of the school. Prof. Jones' room is directly in the right of the main entrance of the building. It is a large, cheerful, airy, well lighted apartment, with a supply closet on the north. The accommodating professor kindly showed me through the school and gave data on the different departments. We first went into the quantitative and qualitative laboratory. This room is in the extreme south wing of the main building. It has just recently been renovated and repaired, quite a number of improvements being made. New shutters are being hung and each desk has been supplied with water and private lockers. A large and much needed fume conductor has been instituted. From here we went into Prof. F. C. Lincoln's room, and next to the assaying department of the school. It is equipped with all the modern conveniences necessary in the execution of all kinds of assay work. Next comes the machinery and metallurgical department. Here are the crushers, bucking board and balances. Each balance is placed on a short stone and cement pier built from the ground up. One of the balances now used in the chemical cabinet is so fine that a pencil mark on a piece of paper can be weighed. The school is also supplied with a gas plant and water distillery apparatus. In the basement under the north wing of the main building is located the geological and mineralogical cabinets. In this department scores of specimens of quartz, mineral and stones from all parts of the world can be found. Prof. Jones has taken great pains during his travels to gather together this collection.

A fine petrographic microscope has recently been added to this department. On the second floor is found Miss J. F. Atkinson, B. of L. She has control of the preparatory department. On the west of her class room, facing the mountains is what used to be an anti room, but now is a nicely decorated study, belonging to Miss Atkinson.

On the third floor is located the draughting and engineering department under the control of Prof. O. R. Smith. This room is well lighted and a fine view of the surrounding country can be obtained. This department is well equipped with desk rooms, closets and blue printing frames. We next visited the assembly room. Miss Anne W. Fitch, assistant in general science, presides there. A large and well filled library is located in this room. Adjustable desks have been instituted for the benefit of the scholars. They are so arranged that they can be raised and lowered according to the size of the pupil.

The building is constructed of sandstone and trachyte, making it very substantial.

THE GEM CITY.

Prospects of Socorro are Brighter Now Than For Many Years.

"The present prospects of Socorro are brighter than they have been in years," says A. D. Coon, one of the oldest settlers and largest property owners of that city. "Things have been looking up for the past year, but not quite so bright as they are just now. The present city administration is composed of wide-awake business men, who are making every effort possible in behalf of building up the town and advertising the natural resources of the wealth and beauty of its surroundings. Our prospects for a glove factory, I must say, are real flattering. We may have to club together and furnish the money for a building, but it will be a good proposition at that. It will not only advertise the town but will serve as an incentive to bring something else here. A company is being formed to raise money to sink a prospect well on the mesa about two miles above town. There is a possible chance of striking either oil, mineral or artesian water. The city now owns its own water works. The water is obtained from artesian springs at the foot of the Socorro mountains. It is especially pure and the supply is sufficient to accommodate a city three times the size of Socorro.

"As a health resort, we defy any city in the southwest to produce such a climate as we have here. Although we are pretty well down in the southern part of the territory, the summers are cool and the winters are warm. Socorro is protected on both the east and west by mountains from the sun in summer and from the wind in winter. The fruit and mineral resources of this part of Socorro county are unquestionable. Orchards are to be found in every direction.

"W. H. Byerts, one of Socorro's most prominent and progressive citizens, who is also a large merchant and property owner, has a fine peach and apple orchard of 35,000 trees on his ranch on the mesa. Mr. Byerts has, with considerable trouble and expense, installed an irrigation system with water brought down from the mountains, which covers the entire orchard. He has also gone to the expense to buy an engine and drill, and will try for oil or artesian water.

"I have a twenty-acre orchard," said Mr. Coon, "in the valley, south of town, that I consider the finest in the Rio Grande valley. The peach trees are in bloom and the apple tree buds are beginning to swell, and the prospects for an extraordinary fruit crop are exceedingly good.

"Capt. Cooney, the present mayor of Socorro, and who will likely be reelected at the next election, recently sold some mining property for \$45,000. This property is less than twenty miles from the city and will be worked during the summer. There are several other mining deals on, when, if closed will bring about \$60,000 into the

town. There is more life in Socorro today than there has been in many years. The present city administration will be re-elected at the coming election."—Albuquerque Citizen.

Having a Run on Chamberlain's Cough Remedy.

Between the hours of eleven o'clock a. m. and closing time at night on Jan. 25th, 1901, A. F. Clark, druggist, Glade Springs, Va., sold twelve bottles of Chamberlain's Cough Remedy. He says, "I never handled a medicine that sold better or gave better satisfaction to my customers." This remedy has been in general use in Virginia for many years, and the people there are well acquainted with its excellent qualities. Many of them have testified to the remarkable cures which it has effected. When you need a good, reliable medicine for a cough or cold, or attack of the grip, use Chamberlain's Cough Remedy and you are certain to be more than pleased with the quick cure which it affords. For sale by A. E. Howell, Socorro; W. M. Borowdale, Magdalena.

Easter Monday Dance.

The Rathbone Sisters will give an Easter Monday dance in the Knights of Pythias hall. A card party will be given in the lodge room at the same time for those who do not care to dance. Admission to the dance, \$1.00; to the card party, 25 cents. Refreshments, 15 cents. Everybody is cordially invited to attend.

Case No. 13.

DEPARTMENT OF THE INTERIOR.
General Land Office, Washington, D. C., March 3, 1902. Notice is hereby given that sealed bids, directed to the Commissioner of the General Land Office, will be received by the Receiver of Public Money at the U. S. Land Office at Las Cruces, New Mexico, up to and including the 2nd day of March, 1902, for the purchase under the provisions of the Act of June 4, 1897, 30 Stat. 34-36, of all dead timber sound enough for fuel and a sufficient amount of mature living timber to make with the dead timber 1,000 cords of wood, to be cut and taken from the SW 1/4 Sec. 4, the NE 1/4 Sec. 5, the NE 1/4 Sec. 8, and the NW 1/4 Sec. 9, all in T. 11 N., R. 19 W., No. 10 of less than 25 per cord will be considered; a deposit of \$100.00 with the Receiver must accompany each bid, and payment in full of the amount of the accepted bid must be made to the Receiver within 30 days from date of notice of acceptance, and no cutting will be allowed until the timber is paid for in full. All dead timber sound enough for fuel must be cut, no living timber less than 12 inches in diameter three feet above the ground will be allowed to be cut, and the brush and rubbish following the cutting must be compactly piled for burning at a safe distance from the remaining timber, and the cutting and removal must be carefully conducted to save the remaining timber and brush and rubbish as far as possible. The cutting and removal will be supervised by an officer detailed for that purpose who will mark the lines of the tract to be cut over and mark the timber to be cut before cutting is commenced; measure and take account of timber cut before the amount of the contract in the case and the Rules and Regulations for compliance therewith will be required of the successful bidder before the work of the ground is commenced. Timber on valid mining or other claims will be exempted from sale. Timber unsold may be purchased on petition therefor within one year from date of notice of sale without further advertisement. Purchasers failing to remove timber awarded within one year from date of notice of sale may be purchased by the Government unless an extension of time is granted. The right to reject any and all bids is reserved. BINGER HERMANN, Commissioner.

Rheumatism

The liniment bottle and flannel strip are familiar objects in nearly every household. They are the weapons that have been used for generations to fight old Rheumatism, and are about as effective in the battle with this giant disease as the blunderbuss of our forefathers would be in modern warfare.

Rheumatism is caused by an acid, sour condition of the blood. It is filled with acid, irritating matter that settles in the joints, muscles and nerves, and liniments and oils no nothing else applied externally can dislodge these gritty, corroding particles. They were deposited there by the blood and can be reached only through the blood. Rubbing with liniments sometimes relieve temporarily the aches and pains, but these are only symptoms which are liable to return with every change of the weather; the real disease lies deeper, the blood and system are infected. Rheumatism cannot be radically and permanently cured until the blood has been purified, and no remedy does this so thoroughly and promptly as S. S. S. It neutralizes the acids and sends a stream of rich, strong blood to the affected parts, which dissolves and washes out all foreign materials, and the sufferer obtains happy relief from the torturing pain.

S. S. S. contains no poison or other mineral, but is a perfect vegetable blood purifier, and most exhilarating tonic. Our physicians will advise, without charge, all who write about their case, and we will send free our special book on Rheumatism and its treatment.

Notice of Forfeiture.

Graham, Socorro County, N. M., Jan. 2, 1902.
To H. Y. Cooper.
You are hereby notified that I have expended one hundred dollars in labor and improvements upon the Copper-Hold mining claim, situated in the Wilcox mining district on Lower Dry Creek, in the Mogollon mountains, in southwestern Socorro County, New Mexico, as will appear by certificate filed in the office of the recorder of said County, in order to hold said mining claim under the provisions of Sec. 2234, Revised Statutes of the United States, being the amount required to hold the same for within ninety days from the service of this notice you fail or refuse to contribute your proportion of such expenditure as a co-owner, your interest in said claim will become the property of the subscriber under said Section 2234.
C. G. THORNTON.

Notice of Forfeiture.

Mogollon, Socorro County, N. M., Jan. 11, 1902.
To Pat Hartford.
You are hereby notified that the undersigned have expended the sum of one hundred dollars in labor and improvements upon the Hinetatic mining claim in the Cooney Mining District, Socorro County, New Mexico, in order to hold said mining claim under the provisions of Sec. 2234, Revised Statutes, being the amount required to hold the same for the year ending December 31st, 1901, and if within ninety days after this notice by publication of interest in said claim will become the property of the subscriber under said Section 2234.
CARIE JOHNSON,
CHARLES GREGORY.

Notice of Forfeiture.

To W. B. Mullins and John Whorton, their heirs, executors, administrators and assigns: You, and each of you, are hereby notified, that the undersigned have during the year 1901 expended one hundred dollars (\$100.00) in labor and improvements upon each of the following named mining claims: Robert E. Lee and Herit Lane, all situate, lying and being in the San Andres Mining District, in Socorro County, Territory of New Mexico. And you, and each of you, are further notified that said expenditures were made in order to hold said mining claims under the provisions of Section 2234 of the Revised Statutes of the United States, for the year ending December 31st, 1901, and if within ninety days after the expiration of the publication of this notice you fail or refuse to contribute or to pay the undersigned your proportion of said expenditures as co-owner or co-owners in said mines and mining claims, your interest in the same will become the property of the undersigned, under said Section 2234 of said Revised Statutes.
